

New Product

Extreme Duty Racing Piston for Ski-Doo 800R Engine Type

Features

- Dedicated forging
- Race proven designs
- Semi-keystone chrome ring
- Electra coated
- CNC Machined
- Dedicated alloy
- Skirt coated
- Made in the USA
- Light Weight

Benefits

- Superior strength to weight ratio utilizing a new hybrid, Aerospace alloy
- Utilized by the top team in snow cross, cross country, and drag racing
- Wear resistant face with pressure back design for long life and optimum ring
- Eliminates ring and piston pin scuffing for increased life and added performance
- Optimal cam shape and profile for peak horsepower and service life
- NEW aerospace high strength alloy
- Reduced friction and quiet operation
- Over 70 years of experience with forged piston technology by American
- Less vibration and improved throttle response

Piston sold complete with piston, rings, pin and clip.

Retail pricing (USD): Piston: \$187.95; Kit: \$463.18
