

New Product

KTM 250 SX-XC-XCW & 300 EXC-MXC-XCW Clutch Basket

Motorcycle

WPP3035
Price (US): \$239.20
Includes forged clutch basket, gear retainer plate, new fasteners, and hex socket.

Wiseco Forged Clutch Baskets

- Wiseco precision forged clutch components have greater strength due to “feature aligned grain flow.” Compared to castings or products machined from billet, Wiseco forged clutch components are lighter and have increased mechanical properties resulting in higher strength, ductility, and resistance to impact and fatigue.
- Specifically designed to capitalize on detailed features that can only be produced by the precision forging process.
- Hard anodized and Teflon coated for a long life of smooth clutch operation through the elimination of wear on contact surfaces.
- Rotational mass is minimized for reduced assembly weight and maximum engine acceleration.
- Forged from lightweight, high-strength, certified, aerospace grade, aluminum alloy.
- Wiseco’s CNC machining process produces each clutch component dimensionally the same as the next.
