2022 Yamaha YZ125 2-Stroke Pistons

A Purpose-Engineered Piston Lineup for Yamaha's Latest 125 Platform

- Engineered, developed, and manufactured in-house in Wiseco's Ohio, USA facility
- Purpose-built for optimal performance in the newly updated Yamaha YZ125 two-stroke engine
- **ProLite** (899M05400 & 899M05600)
 - Drop-in, forged replacement optimizes greater strength-to-weight ratio over OEM part
 - Additional forced pin oiling improves small end bearing and wrist pin lubrication
 - ArmorGlide skirt coating reduces skirt and cylinder wear and improves performance through reduced operating friction
 - Offered in +2mm overbore option for higher displacement builds
- **GP Series** (900M05400)
 - Forged material offers increased tensile strength over OEM cast components and lightening operations result in approximately 7-gram weight savings over OEM
 - Proprietary ArmorX coating in critical areas provides highly protective thermal barrier, reducing heat-induced damage and wear, and preventing ring microwelding
 - Shares the same ArmorGlide skirt coating and pin oiling benefits as ProLite
- **Racer Elite** (RE931M05400)
 - Forged from 2000-series alloy, offering maximized strength-to-weight ratio with the highest tensile strength and lightest weight. ***Ideal for high load, racing applications***
 - Shares the same thermal protection and pin oiling benefits of GP Series piston with ArmorX coating
 - ArmorFit skirt coating conforms to cylinder for optimized clearance and reduced friction and wear
- All Wiseco '22 YZ125 piston kits include a high-quality piston ring, high-strength wrist pin, and circlips
