FOR DIRT BIKES & ATVS

# RADIATOR HOSES

CV4 radiator hoses are made from the highest-grade silicone material available in order to not only improve heat and abrasion resistance, but also improve ease of assembly and disassembly. CV4's radiator hose kits are available in standard and Y-kit configurations. Y-kits have joints formed into the hoses themselves, reducing the number of fittings and clamps necessary, protecting against leaks and improving coolant flow and efficiency of your bike's cooling system.

- Silicone material remains pliable and durable over lifetime of the hoses
- Improved abrasion resistance
- Increased burst pressure over OEM hoses
- Improved puncture resistance
- Silicone inner wall doesn't stick to mounting surfaces like OEM material
- Elevated temperature rating up to 425°F
- Material improves flow capacity

### APPLICATIONS:

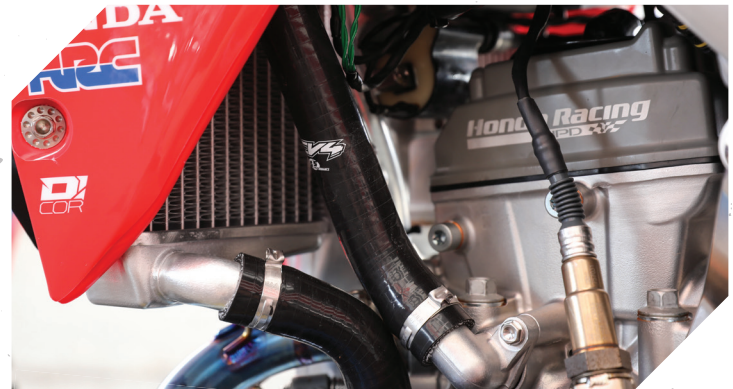

- Beta	- Husaberg	- Polaris
- Can-Am	- Husqvarna	- Suzuki
- Cobra	- Kawasaki	- Yamaha
- Honda	- KTM	

Available in standard kits, or in some applications, the CV4 Y-technology Y-kits for increased flow and failure resistance.

Available colorways:

- ▶ **Y-Technology:** One-piece design eliminates factory, leak-prone connections and provides smoother transitions for improved coolant flow.
- ▶ **Increased Flow:** Smooth bore increases flow efficiency.

# RADIATOR CAPS

- Helps prevent overheating
- Increased pressure rating equates to higher boil-over point
- Higher coolant pressures dissipate heat from cylinder heads more efficiently
- Available for most bike makes and models

See page 19

## TEMPERATURE STRIPS

CV4 adhesive-back temperature strips have a wide range of potential uses where temperature monitoring is crucial, from radiators to cylinder heads to shock bodies. They come in packs of 3 and are designed with incremental temperature monitoring sections that change color once that temperature is reached. Simply stick on they're ready to go!

- Indicators change color when temperature is reached
- Indication range of 149°F to 248°F
- Supplied in packs of 3

See page 19

## THERMAL BARRIER FILM

CV4 thermal barrier film provides heat reflection to just about anything the film is applied to. Many racers choose to use these films on things like fuel tanks and fuel lines to keep fuel cooler and horsepower higher. These films are available in two different heat resistance ratings indicated by silver and gold finishes.

- Silver film protects against highly-elevated temperatures of up to 1200°F
- Gold film protects against temperatures up to 800°F
- Up to 36% temperature reduction
- Adhesive backing for easy installation
- Supplied in 12" x 24" sheets

See page 19
